Your personalised nutrition plan

Here is your daily meal plan based on your breastfeeding stage and the food preferences you selected.

Breastfeeding stage **Early lactation**
Country **South Africa**
✓
Your plan is ready.

Your meal plan meets the nutrition and food-preference checks used by the recommender.

Your daily nutrition targets

These energy and protein targets are personalised using the information you provided.

Energy ✓
2 277 kcal
Your daily target: **2 277 kcal**

✓ Your meal plan is within your personalised target range.

Protein ✓
71,5 g
Your daily target: **71,5 g**

✓ Your meal plan is within your personalised target range.

Why this recommendation?

Your meal plan is personalised using information about you, your breastfeeding stage and the food preferences you selected.

Breastfeeding stage

Your baby's age places you in the **Early lactation** stage. Your breastfeeding stage is used when determining the nutrition guidance for your plan.

Your nutrition needs

An interpretable prediction model uses your personal information and breastfeeding stage to estimate your daily energy and protein needs.

Your food preferences

Your selected diet, allergies, cuisine preferences and excluded foods are considered when choosing suitable meals for your plan.

▼ **How does the prediction model work?**

The system uses a Generalized Additive Model (GAM), an interpretable machine learning model, to estimate personalised energy and protein requirements. These targets are then used by the meal-planning system to select foods and portions that aim to meet your nutrition needs while respecting your food preferences.

Your preferences

Diet
No specific diet selected
Allergies
No allergies selected
Cuisine
No specific cuisine selected
Foods excluded
No foods excluded

Your recommended meals

Use the household portions below as a practical guide for your meals.

Breakfast

Apple raisin oatmeal
1¼ medium bowls (about 242 g)
Chia seeds
1½ tablespoons (about 23 g)

Lunch

Salmon quinoa vegetable bowl
¾ medium bowl (about 370 g)
Kale, raw
1¼ cups (about 100 g)

Snack

Apple orange tahini snack
1½ small snack plates (about 382 g)
Blueberries, canned
¾ cup (about 200 g)

Supper

Rice, cooked with coconut milk
1¼ cups (about 225 g)
Dandelion greens, cooked
1 cup (about 122 g)

Vitamins and minerals

This table shows how your meal plan compares with the daily nutrition targets used for breastfeeding women.

Nutrient	Your plan	Daily target	Status
Vitamin A	1 100,00 µg	1 100,00 µg	✓ Met
Vitamin B2	2,00 mg	2,00 mg	✓ Met
Vitamin B6	2,29 mg	1,70 mg	✓ Met
Folate	596,17 µg	500,00 µg	✓ Met
Vitamin B12	3,80 µg	3,80 µg	✓ Met
Vitamin C	269,40 mg	135,00 mg	✓ Met
Vitamin D	13,41 µg	10,00 µg	✓ Met
Iron	22,04 mg	16,00 mg	✓ Met
Magnesium	638,25 mg	300,00 mg	✓ Met
Zinc	9,90 mg	9,90 mg	✓ Met
Selenium	96,45 µg	85,00 µg	✓ Met

Nutrient	Your plan	Daily target	Status
Vitamin B1	2,03 mg	1,11 mg	✓ Met
Calcium	958,39 mg	950,00 mg	✓ Met

These targets are nutrition planning guides and do not diagnose a nutrient deficiency.

Other nutrition information

Fat	Carbohydrates	Fibre	Sodium
96,9 g	**295,4 g**	**46,2 g**	**1 289 mg**

These values provide additional information about the nutritional composition of your daily meal plan.

Important information

Iodine is not shown because the food dataset does not contain enough reliable iodine information to assess your intake.

This meal plan provides general nutrition guidance and does not replace personalised advice from a doctor, dietitian, nurse or other qualified healthcare professional.

Your individual needs may differ, especially if you have a medical condition, take medication, have been advised to follow a special diet, or have concerns about your own or your baby's nutrition.
