Your personalised nutrition plan

Here is your daily meal plan based on your breastfeeding stage and the food preferences you selected.

Breastfeeding stage **Early lactation**
Country **South Africa**
✓
Your plan is ready.

Your meal plan meets the nutrition and food-preference checks used by the recommender.

Your daily nutrition targets

These energy and protein targets are personalised using the information you provided.

Energy ✓
2 268 kcal
Your daily target: **2 277 kcal**

✓ Your meal plan is within your personalised target range.

Protein ✓
71,5 g
Your daily target: **71,5 g**

✓ Your meal plan is within your personalised target range.

Why this recommendation?

Your meal plan is personalised using information about you, your breastfeeding stage and the food preferences you selected.

Breastfeeding stage

Your baby's age places you in the **Early lactation** stage. Your breastfeeding stage is used when determining the nutrition guidance for your plan.

Your nutrition needs

An interpretable prediction model uses your personal information and breastfeeding stage to estimate your daily energy and protein needs.

Your food preferences

Your selected diet, allergies, cuisine preferences and excluded foods are considered when choosing suitable meals for your plan.

▶ **How does the prediction model work?**

Your preferences

Diet
vegetarian
Allergies
No allergies selected
Cuisine
No specific cuisine selected
Foods excluded
No foods excluded

Your recommended meals

Use the household portions below as a practical guide for your meals.

Breakfast

Oatmeal, regular or quick, made with non-dairy milk, fat added
1½ cup, cooked (about 360 g)
Blueberries, dried
¼ cup (about 40 g)

Lunch

Mediterranean chickpea quinoa salad
1 plate (about 414 g)
Carrots, raw, salad
½ cup (about 100 g)

Snack

Apple orange tahini snack
1½ small snack plates (about 382 g)
Oatmeal, instant, plain, made with milk, fat added
1 cup, cooked (about 227 g)

Supper

Vegetable egg noodle stir-fry
1 large bowl (about 426 g)
Milk, reduced fat, fluid, 2% milkfat, with added vitamin A and vitamin D
¾ cup (about 150 g)

Vitamins and minerals

This table shows how your meal plan compares with the daily nutrition targets used for breastfeeding women.

Nutrient	Your plan	Daily target	Status
Vitamin A	2 193,49 µg	1 100,00 µg	✓ Met
Vitamin B2	2,04 mg	2,00 mg	✓ Met
Vitamin B6	2,53 mg	1,70 mg	✓ Met
Folate	503,37 µg	500,00 µg	✓ Met
Vitamin B12	3,97 µg	3,80 µg	✓ Met
Vitamin C	228,63 mg	135,00 mg	✓ Met
Vitamin D	9,50 µg	10,00 µg	⚠ Attention
Iron	24,52 mg	16,00 mg	✓ Met
Magnesium	607,73 mg	300,00 mg	✓ Met
Zinc	12,63 mg	9,90 mg	✓ Met
Selenium	90,75 µg	85,00 µg	✓ Met
Vitamin B1	1,60 mg	1,11 mg	✓ Met
Calcium	1 550,01 mg	950,00 mg	✓ Met

These targets are nutrition planning guides and do not diagnose a nutrient deficiency.

Other nutrition information

Fat	Carbohydrates	Fibre	Sodium
88,1 g	**306,1 g**	**45,3 g**	**2 216 mg**

These values provide additional information about the nutritional composition of your daily meal plan.

Nutrients that need attention

Your meal plan is lower than the daily target for the nutrient below.

Vitamin D

This food plan provides less Vitamin D than the 10 µg/day planning target. Vitamin D can be difficult to obtain from food alone. Consider Vitamin D-fortified foods and discuss whether a Vitamin D supplement is appropriate for you with a doctor, dietitian, nurse or other qualified healthcare professional.

Your plan provides **9,50 µg** compared with a daily target of **10,00 µg** .

Fortified foods may help with some nutrients. Before starting or changing a supplement, speak to a doctor, dietitian, nurse or other qualified healthcare professional.

Important information

Iodine is not shown because the food dataset does not contain enough reliable iodine information to assess your intake.

This meal plan provides general nutrition guidance and does not replace personalised advice from a doctor, dietitian, nurse or other qualified healthcare professional.

Your individual needs may differ, especially if you have a medical condition, take medication, have been advised to follow a special diet, or have concerns about your own or your baby's nutrition.
